Students in Accounting A.S., Business Administration, Community, Economic, and Urban Development, Computer Information Systems, Economics, Finance, International Business, Management, and Marketing normally follow the Business, Science, Technology, Engineering, and Mathematics (BSTEM) placement pathway.

Placements are generally available 2-3 days after students complete their SWC application. An email with your placements should be in your MySWC email. If not, log-in to your MySWC account and then click on this link, [My SWC Placements](#), to see your specific placements.

The course requirements list the classes needed to complete the program of study.

The placement level indicates your starting point in math or quantitative reasoning for your program of study. Students may use a single math course to fulfill General Education math/quantitative reasoning and major requirements, if applicable.

Individual situations and needs are different. **SWC STRONGLY** recommends speaking with a counselor about your individual circumstances and goals in education planning.
