

H STREET ENTRANCE

Project Description:

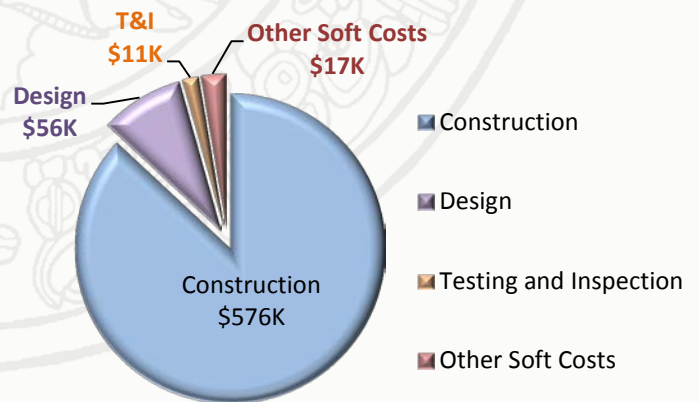

The H Street Entrance and campus access road alignment needed to be adjusted due to the new solar project in Parking Lot J. This realignment afforded the District with the opportunity to significantly improve traffic flow and pedestrian movement.

On April 21st, 2014 the H Street entrance re-opened to enhance onsite traffic flow, alignment, and configuration of the on-campus roadway. In addition to the general student access, this entry serves as the designated public access for sporting events. It successfully separates access to the parking stalls directly from the roadway.

Project Features:

- Traffic flow enhancements
- Increased pedestrian access
- Prepares area for Solar Project

Project Budget: \$700K
