

How can I stop students from printing my tests in Blackboard?

Worried that student will print your quiz in Bb and share it with others?

Cut and paste this code into the first question of a Bb quiz.

```
<style type="text/css">@media print {BODY {display:none}}</style>
```

The line does not display in the exam question, however, it will prevent printing from any browser that supports cascading style sheets. It has been tested with IE 5.5 and Netscape 4.08, and it works. It doesn't prevent screen captures, or File/Save As, but should at least foil the casual cheater.
