

Programs in International Business, Community Development, and Leadership

These programs at SWC Higher Education Center at Otay Mesa focus on workforce development in business and industry. Several of the programs, such as International Business and Logistics, are vital to the area due to the Center's proximity to the US/Mexico border crossing at Otay and the new border crossing which will be built east of Otay within the next few years.

The array of programs offered will prepare our students with the unique skills required by business and industry in South San Diego County and the border region as well as throughout San Diego County. Several of these programs can be taken online, and students can receive a Basic, Intermediate or Advanced Certificate as well as an Associate Degree. The list below provides a link to more information for each program and indicates those which can be taken fully or partially online.
