Updated 09/28/15

Welcome to Southwestern College Health Services

The established philosophy of Health Services is to promote, encourage, and assist the students and staff to maintain good health and safety habits for themselves, their family, and their community, while in pursuit of their educational goals and objectives.

Eligibility / Cost & Fees

If you are currently enrolled in classes at Southwestern College and have paid the health fee, you are eligible for general office visits and Personal Wellness visits. Fees are charged for some services, such as blood testing or immunizations.

Student Accident Insurance

Accident insurance is provided for campus or college activities. To be eligible for accident insurance, students must notify their instructor and/or Health Services immediately and must be currently enrolled in the class. This insurance is secondary to any privately held insurance coverage and a deductible will apply.

Additional accident/illness insurance plans are available to all students at low-cost premiums. Brochures are available in Health Services.

Confidentiality / Medical Records

Your medical record is confidential and will only be released to another individual or facility by your written request and signed release, except as otherwise required by law.

Personal Wellness Services

The overall purpose of the Personal Wellness Services at Southwestern College is to provide high quality behavioral health care to students in order to support the student's emotional well being, academic success and retention at the college.

If you are currently experiencing a crisis in your life, we offer help by providing student's with access to psychotherapy and other supportive services through the Personal Wellness Services.

These services include brief, supportive, individual psychotherapy sessions, couples and family therapy on a select basis and emotional well being workshops provided by a Licensed Psychologist or a registered Marriage and Family Therapist Intern.

Program Objectives

- Help manage, contain, and resolve behavioral health symptoms resulting from stress or a personal crisis
- Optimize student psychological, social and academic functioning
- Enhance coping skills
- Facilitate emotional well-being, student success and retention
- Prevent decline in psychological, social and academic functioning
